BCR

COIN RECYCLER

Money Controls

BCR

Description

CPI's Bulk Coin Recycler (BCR) provides capable coin handling. It accepts coins in bulk, accurately sorts them into coin hoppers and outputs correct change at the end of a transaction.

BCR can be configured to have between 3 and 6 coin hoppers and utilizes a hopper tray that can be easily pulled out for convenient access to each of the 6 hoppers.

Ideally suited for retail self-checkouts, BCR is optimized for fast and easy integration into OEM systems. Simple software integration is provided through a user friendly API using a standard USB connection.

Benefits

Maximum Uptime with High Coin Capacity

BCR can hold up to 1,200 €1 coins, minimizing the need for refilling and cashier intervention

Reduced Downtime with auto Jam Detectionand Clearance

BCR can automatically recover from jam situations reducing the need for operator interventions and maximizing operational efficiency

Protect assets with advanced security

Detailed audit data provides comprehensive record of coins in and out

Accurate coin validation minimizes the risk of accepting fraudulent coins

Lock options prevent access to coin hopper bowls

Certified by the European Anti-Fraud Office (OLAF)

Specifications

Dimensions (H x W x D mm)

- 665mm x 235mm x 525mm

Coin Capacity

- 1011 x .01c, 759 x .02c, 591 x .05c, 592 x .10c, 421 x .20c, 318 x .50c, 354 x €1, 305 x €2

Enclosure / Mounting

- Needed/Not included

Coin Denominations

- 6

Operating Temperature

- 0°C to 55°C

Coin-in to Coin-out Height (mm)

- 120mm

Power Requirements

- 24V DC, 0.5 A (11A Peak)

Variants

Standard

Rear Access

Low Profile
