COIN RECYCLER

CLS

Description

The CLS Coin Recycler is noted for its high speed coin handling capabilities and compact dimensions. It provides efficient and accurate coin management in both embedded solutions such as self-check outs and standalone applications such as counter tops.

CLS can validate 10 coins per second and sort them into 8 separate denominations. It also supports most of the world's currencies.

Freestanding counter top coin recycling or can be embedded in a cash payment device

Benefits

Maximum Customer Throughput with Faster Transactions

50 coins in, 10 coin per second acceptance - accelerate customers through the payment process

Compact Dimensions - provides design flexibility and minimizes real estate

Flexibility to be integrated in a variety of applications such as Self checkouts in grocery lanes, automated bank tellers and standalone payment kiosk

Maximum Uptime with High Coin Capacity

CLS can hold up to 2,640 €1 coins, minimizing the need for refilling and cashier intervention

Protect assets with advanced security

Fully enclosed, dual-locking system to secure coins

COIN RECYCLER

Specifications
