SNR

NOTE RECYCLER

CashCode

SNR

Description

The Single Note Recycler (SNR) is a field proven, highly efficient yet compact single denomination bill recycler that includes note validation technology. This multi-width, single note bill recycler was designed to reduce cash handling costs for the Operator. It accepts and dispenses bills one at a time, and automatically replenishes the bill dispensing cassette using end-user inserted notes.

This unit can be used in several payment systems with a coin recycler or hopper, including Parking pay-on-foot (POF) stations and bill payment kiosks.

Benefits

Reduced cash handling costs with fewer cash-related service calls for coin depletion and note collection

Increased user satisfaction in your machines as customers can now pay with higher denominations and no longer receive bulk coins as change

2 digit LED display shows the number of bills in recycling cassette indicating whether service will be needed soon or not

Fast bill acceptance and payout for a better consumer experience; complete transport cycle at only 2.5 seconds

Specifications

Dimensions (H x W x D mm)

- 456mm x 109mm x 185mm

Note validation

- 62mm - 77mm Width
- 120 mm – 160 mm Length

Interfaces Supported

- MDB, ccNet, ccTalk

Denominations Recycled

- One

Maximum Stacking Capacity

- 400 or 600 notes in drop cassette

Note Memory Capacity

- 30 or 70 notes (denomination configurable)

Operating Temperature

- -18°C to 60°C

Firmware Updates

- Memory stick, Interface connector

Compliance

- CE, IEC 60950-1, FCC, ICES-003, RoHS

Acceptance Rate

- 96% or higher

Power Requirements

- 22 V - 40 V DC

Operating Voltage (V)

- 22 V - 40 V DC

Bezels

- Standard plastic, Coin-proof plastic, Coin/Vandal-proof metal

Validation Sensors

- Optical, Inductive, Dielectric, Cross-channel (anti-stringing)

Note Insertion

- 4-way
